KELLY GUZMAN

GRC & AI SECURITY COMPLIANCE | NIST SP 800-53 | RMF | CYBER RISK | LLM RED TEAMING

Coeur d'Alene, ID | Remote | 208-518-8816 | zerotrustjobsearch@proton.me | LinkedIn | Cybersecurity Portfolio | MATRIS Console

PROFESSIONAL SUMMARY

GRC and AI security compliance professional with 15+ years of media-center management experience, additional federal field operations experience, and hands-on security and compliance work across federal-contractor and PCI-regulated environments. Developed a complete NIST SP 800-53 Rev. 5 Low baseline compliance and assessment package for a live production system, including an SSP, 18-family policy manual, SAR, POA&M, control mapping, evidence evaluation, and risk assessment. Built the MATRIS Method™ no-code LLM red-teaming console to document OWASP-mapped adversarial tests, findings, and risk decisions. Combines technical literacy, structured assessment, and clear stakeholder communication to identify gaps and support remediation.

CORE COMPETENCIES

GRC & Security Assessments: NIST SP 800-53 Rev. 5, NIST SP 800-53A, RMF, NIST CSF, SSP, SAR, POA&M, policy development, control mapping, evidence evaluation, findings documentation, risk assessment, remediation tracking

AI & LLM Security: MATRIS Method™ no-code red teaming, OWASP-mapped adversarial testing, prompt injection, jailbreak testing, sensitive-information disclosure, excessive agency, LLM risk evaluation, responsible AI guardrails

Federal & Regulated Environments: Federal contractor operations, FAR/SAM.gov lifecycle, PCI DSS, regulated deployment documentation, audit readiness, compliance records

Technical Security Literacy: Access control, audit logging, vulnerability management, incident response fundamentals, SIEM/log analysis, TCP/IP, DNS, firewalls, VPN, Active Directory, endpoint security, Cloudflare WAF/DNS/SSL-TLS, email authentication

PROFESSIONAL EXPERIENCE

Security & Compliance Lead

Community Tech Aid | Remote | June 2025 - Present

- Lead the security and compliance program for a live AI-powered consumer technology platform, defining the authorization boundary, control responsibilities, assessment scope, and remediation priorities.
- Authored a complete NIST SP 800-53 Rev. 5 Low baseline package: 136 control implementation statements, customer responsibility matrix, three-layer authorization boundary, 18-family security policy manual, SAR, and POA&M.
- Conducted a NIST SP 800-53A assessment using Examine, Interview, and Test methods; evaluated evidence and documented 42 Satisfied, 25 Satisfied (Inherited), 51 Other Than Satisfied, and 18 Not Applicable control determinations.
- Documented 20 findings by condition, effect, cause, and recommendation; disclosed assessor non-independence and corrected three determinations where evidence did not support the original implementation claim.
- Created a 20-item POA&M with accountable owners and target dates; supported remediation of seven weaknesses, including broken access control and forgeable audit-log conditions.
- Created and tested the MATRIS Method™, a visual, no-code LLM red-teaming console. Ran seven OWASP-mapped adversarial test categories against a live chatbot and captured human-reviewed PASS/WARN/FAIL outcomes and structured evidence.
- Evaluated platform and AI-related risks, including access controls, auditability, LLM abuse resistance, private administrative tooling, and a wildcard CORS misconfiguration affecting a local inference API.
- Maintain platform controls through Cloudflare WAF, DNS, SSL/TLS, DDoS protection, and email authentication; translate technical issues into clear documentation for non-technical stakeholders.

Owner & Field Technician | Federal and Regulated Deployments

eBiz Market, LLC | Remote and On-site | July 2016 - June 2025

- Executed federal device-upgrade rollouts under defined compliance requirements for USPS facilities and the Verizon Modification Team, coordinating scheduling, configuration, documentation, and completion verification across Washington and Idaho.
- Deployed and verified PCI DSS in-scope payment and point-of-sale hardware across three national retail brands, supporting Requirements 1, 2, 8, and 9 through device configuration, access control, physical security, and client compliance records.
- Led multi-vendor enterprise deployments across more than six national brands, coordinating site requirements, issue resolution, stakeholder communication, and delivery documentation.
- Maintained eBiz Market, LLC as an active SAM.gov registrant, including registration renewal, representations and certifications, and federal contracting lifecycle compliance.

- Supported residential and small-business clients with device security, user education, system upgrades, and risk-aware technical guidance across Windows and macOS.
- Maintained a 98% deliverable rate as an approved Field Nation and WorkMarket provider across federal, enterprise, and small-business engagements.

ADDITIONAL EXPERIENCE

Media Center Manager

15+ years of experience

- Managed media-center operations over a 15+ year period, bringing sustained experience in operational coordination, service delivery, information handling, and support for diverse users.

PROFESSIONAL CERTIFICATIONS

- CompTIA Security+ (SY0-701) - CompTIA, October 2026
- Google Cybersecurity Professional Certificate - Google (Coursera), May 2026
- Google AI Professional Certificate - Google (Coursera), June 2026
- AI Security Fundamentals: LLM Threats & OWASP 2026 - Packt (Coursera), August 2026
- Red Teaming LLM Applications - Coursera project, August 2026
- Google AI for App Deployment - Google (Coursera), August 2026
- Google AI for App Building - Google (Coursera), June 2026
- Google AI for Research and Insights - Google (Coursera), June 2026
- Google AI Fundamentals - Google (Coursera), May 2026

All badges: Credly profile

COMMUNITY LEADERSHIP

- Chief Polling Judge, Kootenai County, Idaho (2021-2024): Led polling operations and the secure, compliant handling of sensitive election materials.
