KELLY GUZMAN

GRC & Compliance Analyst | Security Operations

Coeur d'Alene, ID 83814 (Remote) | 208-518-8816 | zerotrustjobsearch@proton.me | linkedin.com/in/ebizmarket | github.com/ebizmarket

PROFESSIONAL SUMMARY

GRC and compliance analyst with 10 years of hands-on IT and field operations experience, including federal and PCI-regulated contract work. Authored a full NIST SP 800-53 Rev 5 compliance package for a live production system: system security plan, 18-family policy manual, security assessment report, and POA&M. Skilled in control mapping, audit evidence, risk assessment, and clear written communication, with working SOC fundamentals in alert triage and log analysis. Cybersecurity Certified with active Security+ prep. 98% on-time delivery across federal and enterprise contracts.

TECHNICAL SKILLS

GRC & Compliance: NIST SP 800-53 Rev 5, NIST SP 800-53A assessment methods, NIST CSF, PCI DSS, SSP authoring, security assessment reporting, POA&M management, policy development, risk assessment, control mapping, audit evidence and documentation, FAR/SAM.gov federal contracting lifecycle

Security Operations: alert triage, log analysis, incident response, threat detection, vulnerability management, ticketing and case documentation

Networking & Systems: TCP/IP, DNS, firewalls, VPN, Windows Server, Linux, Active Directory, endpoint security

Tools: Wireshark, Cloudflare (WAF, DNS, SSL/TLS, DMARC/SPF/DKIM)

Generative AI & AI Tooling: LLM application development, prompt engineering, Responsible AI, local model deployment and hardening (Ollama), AI-assisted research and content creation (AI Professional Certificate, 2026)

WORK EXPERIENCE

Security & Compliance Lead

June 2025 to Current

Community Tech Aid | Remote

Security & Compliance

- Authored and published a complete NIST SP 800-53 Rev 5 LOW baseline compliance package for a live production system: 136 control statements with a customer responsibility matrix and three-layer authorization boundary, an 18-family security policy manual, a security assessment report run under 800-53A Examine/Interview/Test, and a 20-item POA&M with owners and target dates.
- Assessment results: 42 controls Satisfied, 25 Satisfied (Inherited), 51 Other Than Satisfied, 18 Not Applicable, with 20 named findings documented by condition, effect, cause, and recommendation. Three controls were graded less favorably in the assessment than the security plan claimed, and assessor non-independence was disclosed in the report.
- Identified and remediated seven security weaknesses during the assessment period, including a broken access control condition in the paid access gate and a forgeable audit log.
- Deployed and hardened a local AI infrastructure environment (Ollama-based model runner) for private administrative work; identified and remediated a wildcard CORS misconfiguration exposing the local inference API, documented in a published security runbook.
- Implemented Zero Trust across the platform, maintaining a zero-breach record since launch.

Platform Build

- Built and operate communitytechaid.ai end to end: an AI-powered consumer tech-support platform built after seeing clients and community members repeatedly fall victim to social engineering, to educate and protect them.
- Architected and operate the platform's full security layer plus the prompt design and Responsible AI guardrails (output evaluation, abuse and jailbreak resistance) fronting its Anthropic-powered LLM assistant.
- Manage all domain names, DNS, and security operations through Cloudflare (WAF, DDoS protection, SSL/TLS, DMARC, SPF, and DKIM), verifying every DNS record across multiple domains.
- Authored and maintain the site blog, translating social engineering, phishing, scams, and account security into clear communication for non-technical users.

- Operate the platform end to end, sustaining 98% uptime and resolving 100% of flagged vulnerabilities via security scans.

Owner and Field Technician July 2016 to June 2025

eBiz Market, LLC | Remote and On-site

- Executed federal device upgrade rollouts under compliance requirements (USPS handheld devices, Verizon Modification Team): scheduling, configuration, documentation, and verification across postal facilities in Washington and Idaho.
- Deployed and verified PCI DSS in-scope payment and point-of-sale hardware across three national retail brands, working to Requirements 1, 2, 8, and 9: device configuration, access control, physical security of cardholder data equipment, and completion documentation for client compliance records.
- Served as lead technician on enterprise deployments (USPS handheld swaps, Kohl's kiosk replacements) and completed solo enterprise contracts across 6+ national brands (ROSS Stores payment terminals, Barnes & Noble server batteries).
- Performed A/V installation, hardware deployment, and post-install troubleshooting across multi-vendor enterprise rollouts (ROSS Stores, Kohl's, Joann Stores).
- Supported residential and small-business clients through collaboration with referral partners on home computer security, user training, system upgrades, and A/V support, across both Windows and Mac platforms.
- Maintain eBiz Market, LLC as an active SAM.gov registrant (UEI ZBWHT4UT7V13, CAGE 9THU0, NAICS 541512), including registration renewal, representations and certifications, and federal contracting lifecycle compliance.
- Maintained a 98% deliverable rate as an approved provider on Field Nation and WorkMarket; rating verifiable on request.

CERTIFICATIONS AND TRAINING

- Cybersecurity Certified, 2026
- AI Professional Certificate, 2026
- CompTIA Security+ (SY0-701), in progress, exam 2026
- CompTIA Network+, accelerated training, 2025
- ISC2 Certified in Cybersecurity (CC), training completed, 2024

COMMUNITY INVOLVEMENT

- Chief Polling Judge, Kootenai County, Idaho (2021 to 2024): managed the secure, compliant handling of sensitive election materials and polling operations.
