Dear Hiring Manager,

I am writing to express my interest in opportunities focused on AI security, governance, risk, and compliance. My work centers on translating technical implementations into defensible compliance evidence, clearly documented risk decisions, and practical remediation priorities.

In my current security and compliance work, I developed a NIST SP 800-53 Rev. 5 Low baseline package for a live AI-powered platform, including a System Security Plan (SSP), security policy manual, Security Assessment Report (SAR), Plan of Action and Milestones (POA&M), control mapping, and assessment evidence. I also conducted a structured assessment using NIST SP 800-53A methods, documented findings, and tracked remediation actions.

I created the MATRIS Method™, a visual, no-code LLM red-teaming console now listed by the OWASP GenAI Security Project. It organizes adversarial testing against OWASP-mapped risk categories and captures human-reviewed outcomes and supporting evidence. This work reflects my broader interest in practical AI security governance: making risks visible, evaluations repeatable, and results useful to the people responsible for decisions and remediation.

My background also includes federal field deployments, PCI DSS-related technology deployments, multi-vendor coordination, and high-accountability public service as a government Chief Polling Judge. I hold the CompTIA Security+ certification and bring a combination of structured assessment, technical literacy, operational discipline, and clear communication with technical and non-technical stakeholders.

I would welcome the opportunity to contribute these skills to a team working to strengthen security controls, assess AI-related risk, improve compliance readiness, and move identified issues toward accountable resolution. Thank you for your time and consideration.

Sincerely,
Kelly Guzman
